Objective: Avoid the orange dots, collect the stars, and bring them to your friend. You lose if you run into an orange dot & you cannot walk through the walls or orange dots.

<div class=“coworker”>

When triangle tries to move into this div, an alert.prompt informs the user they lost. When they press “OK”, the board is reset.

<div class=“food”>

When the triangle moves into this div, the star disappears, and the 1 is added to the array (used for checking to see if all stars were collected)

<div class=“friend”>

When the triangle enters into this div, it means they have foudnd their friend. If they have collected all the stars, they will get a prompt.message congratulating them.

<div class=“desk”>

The triangle cannot move into this div.
